ASAM Criteria Implementation: New Tools, New Partnerships

Maureen Boyle, PhD

Dr. Boyle is the Chief Quality and Science Officer at ASAM. She provides strategic oversight and leadership of ASAM's quality and science initiatives, including clinical practice guideline development and The ASAM Criteria standards.

Mathew Roosa, LCSW-R

Mr. Roosa is a consultant who provides training, coaching, technical assistance and planning support to universities, research studies, governments and health and human service provider organizations. He was a founding member of NIATx, and currently works part time at the UW Madison Center for Health Enhancement Systems Studies (CHESS). Focusing on quality/process improvement and implementation of evidence based practices, Mr. Roosa's experience also includes psychotherapy for mental health and substance use in agencies and private practice, teaching at the undergraduate and graduate levels in Human Services and Social Work, agency administration, and governmental planning.

Todd Molfenter, PhD

Dr. Molfenter has spent the last decade leading the application of NIATx change methods to improve health and health system performance. The NIATx model described in today's presentation has been found to be effective in 30+ peer-reviewed publications and has consistently provided a tool to implement successful beneficial change within healthcare organizations.

Scott Boyles

Scott is a licensed addiction counselor, MINT trainer and the Senior National Training Director for Train for Change Inc. Scott has spent more than three decades in the behavioral health field and has many years of experience working with The ASAM Criteria. Scott is a member of the ASAM Steering Committee for the ASAM Patient Placement Criteria. He also spent many years as a site reviewer, monitoring programs' application of the Criteria. Since 1993, Scott has trained thousands of people in proper use of the Criteria.
